

JSL::Vector

```
graph BT; JSL_Quaternion[JSL::Quaternion] --> JSL_Vector[JSL::Vector]; QDynamics_Quaternion[QDynamics::Quaternion] --> JSL_Vector;
```

The diagram illustrates a class hierarchy. At the top is a box labeled 'JSL::Vector'. Below it, two boxes are positioned side-by-side: 'JSL::Quaternion' on the left and 'QDynamics::Quaternion' on the right. A horizontal line connects the bottom of these two boxes, and a vertical arrow points upwards from the center of this line to the bottom of the 'JSL::Vector' box, indicating that both 'JSL::Quaternion' and 'QDynamics::Quaternion' inherit from 'JSL::Vector'.
